Subject: RE: Proposed High Voltage Transmission Lines Across Polk County

Dear Mr. Ennis,

This is to acknowledge receipt of your email to the Public Service Commission of South Carolina. Your email will become a part of ND-2015-20-E - Duke Energy Carolinas: Foothills Transmission and Substation Project- 45-Mile Transmission Line Between Asheville, NC, Power Plant and New Substation Near Campobello, SC, and will be posted on our website under this docket.

Please let me know if you should require any additional information.

Sincerely,

Deborah Easterling
Administrative Coordinator

Subject: Proposed High Voltage Transmission Lines Across Polk County

Ms. Boyd,

I want you know how enraged my family and our neighbors are over Duke Energy's proposed new transmission lines across our land (yes, across my back property line) here in Polk County. As I understand it they are planning for future growth in the Asheville area, connecting a new Campobello substation with a new gas fired power plant north of the Asheville Airport. There is an existing route that they could upgrade to carry more lines rather than carve a new right-of-way across our foothills and mountains. As construction becomes more energy efficient and users more sensitive to their use of energy the use of electricity in our area could actually shrink over time; and, in fact, it has recently according to Duke's drop in income.

Please, make every effort to come up with another solution.

Thank you!

Very Sincerely,
William Ennis
